Re: Compact Cabinet Coolers

Dear Allen:

This is just a note to give you an update on the use of your coolers on our control enclosures.

From the beginning a few years ago we have had no problems with the application and use of these coolers. The cooler has kept the internal NEMA 12 enclosure within 2° of the external cabinet temperatures over a wide range of temperatures.

This application was not just used once or twice but dozens of times with consistent results.

Keep supplying a quality product at a reasonable price and you will continue to be our first choice in cabinet cooling.

Best regards,
